In the year 2384, humanity has conquered death. Our consciousness can be digitized and stored on "stacks" implanted in our bodies, allowing us to transfer our minds into new bodies when our old ones die.

Takeshi Kovacs is a former "Envoy," a special forces operative whose stack was destroyed in the war against the Martian Congressional Republic.

Resleeved into a new body, he is hired by the enigmatic Laurens Bancroft to solve the murder of his own body.

As Kovacs investigates, he uncovers a web of conspiracy, corruption, and violence that threatens the very fabric of society. He must confront his own past, his own mortality, and the nature of consciousness itself.
